PROFESSIONAL SUMMARY

Results-driven Senior Front-End Developer and Certified Scrum Master with 4+ years of hands-on experience delivering high-performance, scalable web applications across fintech, CRM, and enterprise domains. Proficient in React.js, TypeScript, Next.js, and real-time technologies (WebSockets, Socket.IO). Demonstrated ability to lead Agile teams, boost sprint velocity by 30%, and reduce codebase redundancy by 40% through component-driven architecture. Adept at bridging technical execution with business goals — transforming stakeholder requirements into clean, accessible, and production-ready UIs. Seeking to bring proven delivery track record and technical leadership to a forward-thinking product team.

PROFESSIONAL EXPERIENCE

Front-End Developer — *Nov 2025 – Present*

Cipherbizz (CipherTech Solution) - (Full Time - Remote) — *Dubai, UAE*

Auction Management System

ASP.NET Razor • C# • REST APIs • CSS3

- Designed and delivered a full-featured auction management UI covering bidder registration, lot configuration, real-time bidding engine, and reporting dashboards — supporting live auction operations for international clients.
- Engineered cross-browser responsive interfaces using ASP.NET Razor views with modern CSS techniques, ensuring consistent UX across Chrome, Firefox, Safari, and Edge.
- Integrated frontend with .NET Web APIs for real-time bidding data flow; implemented live UI state updates using polling and REST hooks, reducing bid reflection latency to under 500ms.
- Enforced secure, scalable UI architecture aligned with enterprise coding standards; optimized bundle size and load performance, achieving measurable improvements in page render times.

Senior Front-End Developer & Scrum Master — *Jan 2025 – Nov 2025*

IAT Technologies – (Full Time – Hybrid) — *Chennai,Tamilnadu*

Custom CRM Application

React.js • TypeScript • Material UI • FastAPI • Socket.IO • Svelte • SDLC (Agile Methodologies)

- Facilitated all Scrum ceremonies (daily stand-ups, sprint planning, reviews, retrospectives) for a 6-member cross-functional team, driving a 30% increase in sprint velocity over 3 quarters.
- Acted as primary liaison between product owners and the engineering team; decomposed business requirements into well-defined user stories with clear acceptance criteria, reducing mid-sprint scope changes by ~35%.
- Architected a modular, feature-based CRM frontend (Leads, Deals, Contacts, Tickets, Tasks) using React.js + TypeScript, enabling independent team ownership of modules and faster feature delivery.
- Built a shared component library (forms, modals, data tables, filters) using Material UI + Svelte, eliminating 40% redundant code and enforcing visual consistency across all product screens.
- Integrated Socket.IO for real-time CRM event notifications (new leads, ticket updates, deal status changes), streamlining agent workflows and improving team productivity by ~25%.

Front-End Developer — *Aug 2022 – Dec 2024*

Gravitus IT Services Pvt. Ltd. – (Full Time – Hybrid) — *Salem,Tamilnadu*

Gravitus Crypto Exchange

React.js • JavaScript ES6+ • WebSockets • Material UI

- Built Spot & P2P cryptocurrency exchange UI from scratch — real-time order books, live candlestick charts, price tickers, and transaction history — serving thousands of concurrent traders.
- Architected WebSocket data pipelines for live trade and order-book feeds, enabling near-instant UI synchronization during high-frequency trading peaks with zero perceptible lag.
- Optimized wallet management and order dashboards with React lazy loading, code splitting, and API response caching — reducing average page interaction time by 20% across key user flows.
- Championed WCAG 2.1 AA accessibility standards and cross-browser compatibility (Chrome, Firefox, Safari, Edge); established design token system and component documentation to accelerate onboarding for new developers.
